

EasyLED Wilmington LED Post Top Luminaire WM21

PRODUCT OVERVIEW

The Wilmington EasyLED Post Top luminaire combines contemporary aesthetics and installer-friendly features for roadway, area, and walkway lighting projects. The IP66 sealed LED light engine offers excellent optical control and heat dissipation for long life. Open frame full cutoff optics control glare and an optional opal LumaLens provides visually soft illumination. The historically inspired traditional form uses smooth sweeping arms with articulated base fitter and provides delivered lumens exceeding typical 250W MH fixtures. The Wilmington is perfect for multi-family residential projects, retail centers, town center streets, and institutional projects.
